

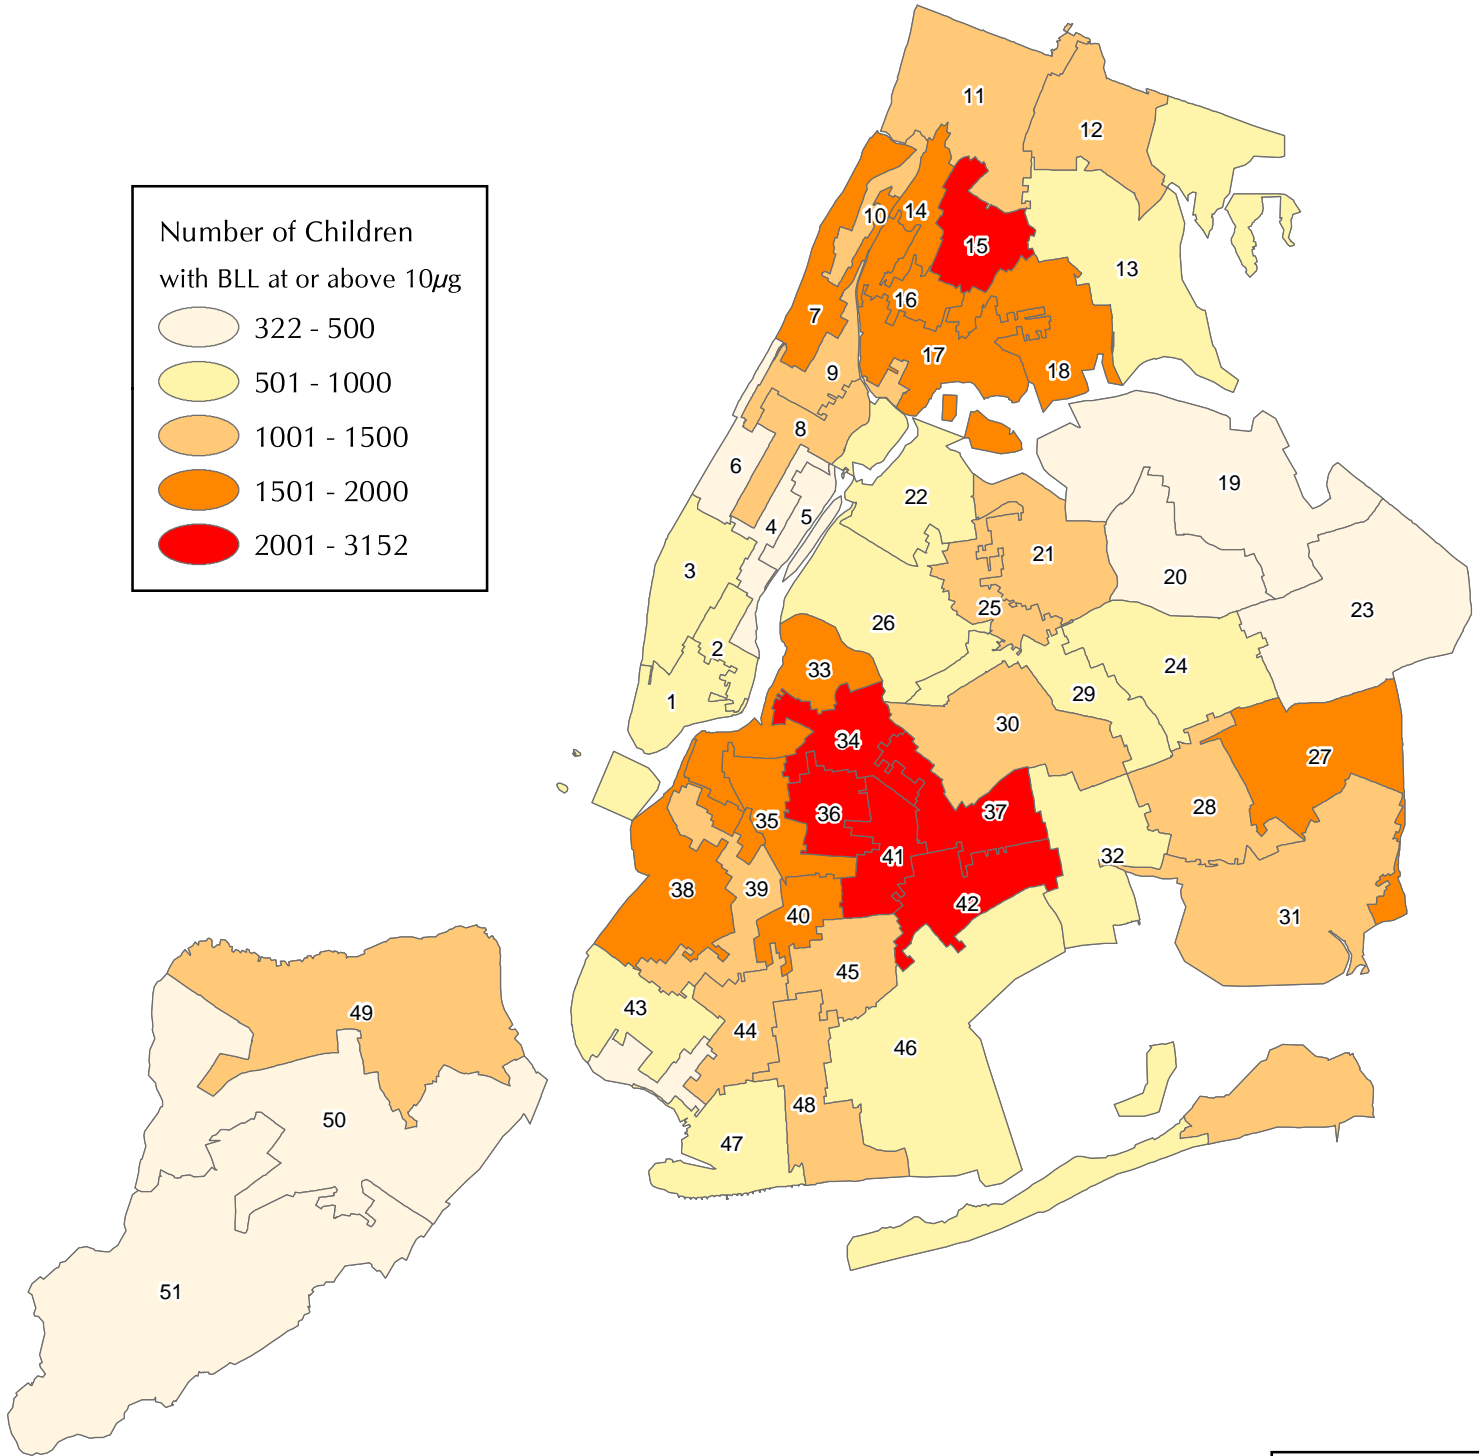

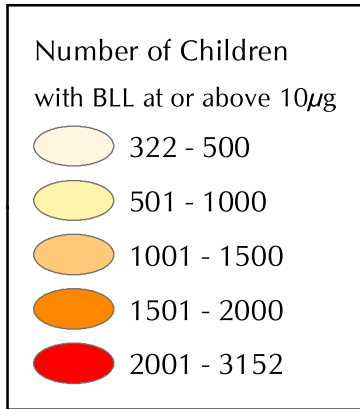

Map 2

Total Number of Children Testing at or Above $10\mu\text{g}$ from 1995 - 2000 by City Council District

Blood level testing data obtained from the NYC Department of Health preliminary data, as of July, 2001 at the ZIP Code level. NYPIRG converted this data to the City Council District level. This might lead to some discrepancies between the numbers shown by the Dept. of Health, and those shown on this map.
